A Fredericksburg letter of the 29d, to the Whig, shows that the rebels are as essentially bothered to understand the movements of our troops as we are theirs. The writer takes comfort in the mud embargo on any movement of our troops.

The rebel Government has purchased 0,000 bales of cotton in Ministropia.

The rebel Government has purchased '0,000 heles of coston in Mississippi, and negotiated for much more.

The rebel Secretary of the Treasury's seport says the debt of the Government in last Decomber was \$550,000,000, and by next July will be \$500,500,000. Last Decomber nearly \$850,000,000 in treasury noise bearing interest were issued, and \$250,000,000 without interest. New Yorax, Jan. 99.—The following is just received from New Orleans, 18th:

A force of cavairy and artillery left Brasheat Citsy-sesterday, and proceeded up the Techs. The rebel gumboat Cotton was sungaged by akirmishers, and her guas allenced by sharp-shooters picking off the granners. A battary was also silenced.

Lieut Communiting Buchansin was killed by a shot from a ride-pit. Our loss was otherwise slight.

Shirmishing is still going on, and the forces are advancing.

Larum.—New Outmans, Jan. 15.—General Weitzel has sunceded in destroying the robol gunboat Cotton, and is recrossing the bay. The expedition was surfrely successful.

Bosvox, Jan. 20.—A letter from Faymaster Train, on board the gunboat Winda, refutes the laite report of her loss. He writes, under date of Jan. 19: We are hunden for non-clade, If we find them, there will be fun shead.

THE PLAIN QUESTION.

The Copperhead organ in this city makes these admissions: 1st. That Jeff. Davis declares in his speeches and messages that he is inflexibly opposed to any compromise, reunion or reconstruction with the North. 2nd. That the Governors of the saceded

2nd. That the Governors of the secoded States make the same declaration. 3d. That the Legislatures of those States concar in, and fully support the Governors. 4th That the prees of Secosia is hitterly hostile to reconstruction on any terms and 5th. That the white population of Secosia are firmly resolved upon separation, and repudiate all propositions for reunion. Mark well these important admissions.

The Copperhead organ further stated that the rebel white population controlling three or four millions of negroes, made the latter, through their labor, just as effective in the war against the Union as an equal number of whites. "Here, then," it said, "was a white and black population of ten "millions inflexibly opposed to the Fed-"cal Government, and asserting their in "dependence." The Copperhead print was of opinion that they could not be put down without annihilation, and conceded that they would accept no terms of com-

to offiction to be made within thirty the notes of the banks would have estired at the rate of two or three miladay, and currency gone up toward instead of continually falling from it, until the whole vacuum created the whole issue is simplified down to one point;—a vigorous prosecution of the war; or, peace and division of the Union. This is the great question before the country and Government—all others are merely side issues, totally irrelevant, and should be restantly in mind that every man who calls for "peace" advocates a division of the Union Let this matter be fairly understood, so that none may be deceived as to the effect of making an armistice. If a majority of the people of the North demand a cessation of hostilities, it will show that a majority are bank circulation, gold will be at 250 or 300 per cent, and a paper dollar will hardly be worth the room in a man's pocket.

THE COPPERRIAD POW-WOW.

Last night we had a Democratic or rather secession pow-wow, in the hall of the House of Representatives, at which. Shashan and Johnson, the great "Democratic martyre to the tyramy of old Abc., spoke, Sheshan is a young man of not much calibre. If the Administration arrested him for a know, it certainly made a most egregious misslake. He made a rambling sort of speech, "without beginning of time or end of days," the substance of which was, that the Administration had chested the people in the object of the war, and consequently it should be supported so longer, by either the money or men of the people. Othersor, who is one of the most piratical-looking individuals it was ever my fortune to look upon, was more bold. He contended that the Administration had initiated revolution, and should be met by revolution—that the different States should put themselves in an attitude of hostility to the Government, read their troops, dc.

Both men, from the commencement, were opposed to the war. So that with them, as with the halance of the party, the proclamation is a mere pretext.

At the meeting the chair was very appropriately filled by Representative Merritt, with whom secession has become a manna. He was formerly an Episcopalian preacher, and, I learn, selected and produced some work were opposed to the war. THE MARCH.

The first day we took upon the nearny

tion of weakness and fear to take proper precaution against suprises from the enemy.

THE MARCH.

The first day we took up our line of march
on the west side of the Mobile and Ohio railroad, through Rienzo, and after marching
twenty-three miles we camped on the plantation of the notorious robel, Dick Smith. At
this piace our soldiers were shocked by the
andacity of the pias and chickens. This is
out of the range of our foraging trains, and
the pigs walked through the camp with a contented graup which astomished our men, and
the chickens would look up and crow right in
their faces. But they paid dear for their indiscretion, for after the dark shadows of evening,
had enshrouded the samp, the stillness of
night was frequently broken by the felat, expiring squeak of an unsuspecting shanghal,
or the distant squeal of a dying porker. And
the next inorming it was very evident that the
few remaining had learned wisdom by experience, for now and then a lonely pig was seen
accumpering to the highest hill or lowest valley, and one or two becaved chickens might
be seen looking down with suspicion from
the Lighest limb of the tailest tree.

The second day we passed through Black
land and Carrellville towards feundown,
end about noon a small party of our cavalry
who had been sent around by way of Boonville, were driven to by Harris' robel cavalry,

side it was detertanced to substants the rericus question.

The bill was further discussed by Mr. Newport of Grundy, and Mr. Faller. Mr. Newport made a very side speech indeed.

The vote was then taken and the bill passed
by a strict party vote.

The passage of this bill has proved to the
Republicans that the Demacrats are determined to take the military power of the State
from the hands of the Governor. What their
intentions are may be judged from the speeches
and resolutions of their late meeting in this
city. They are revolutionary, and the ultimate intention is to sell the State into the
hands of Jeff Davis and his minions.

With this small force we went sixty miles into the very howels of rebeldom, and after the first ten miles we were entirely isolated from our forces at Corinth, for we had partition our forces at Corinth. san rangers and guertliss on our rear, on each sank, and we knew nothing of the force in front. This extreme uncertainty of what was ing orders to be very careful and not be cut

But we were very fortunate in being under a commander who did not belong to either of the two classes so common among our officers now in the field. The first class are like the bull that attempted to but the locomotive off the track; we "admire their plack, but d-n their discretion." The other class are those who think discretion the better part of valor, and like Hubbras "He that fights and runsaway "Shall live to fight another day."

skill with which they performed that manure.

We marched about twenty railes and encounsed between Carcilville and Guntown, about three miles to the right of Baldwin. We had taken severious prisoners. It was reported here that a large rebelforce had been passing through Guntows for two days, espiposed to be reinforcements for Bensberton from Brage's army. One of the officers came to Col. Marcy and inquired what we should do, for we had to pass through mutown. The Colonal's reply was. — We have only to shope or greatinged. The officer, knowing how difficult if was to convine the Colonal on the point of getting whipped, replied, "Well, if that's the case we all prefer to whip." To this the Colonal and, with son ciderable assistanting in the officer's conclusion, and with his peculiar German accent, "Dat is de ting, dit is de ting."

thing, saying she whole movement was a re-flection on the government. The gallantsons of his own Siste had just passed through the ice-covered streets of the capital, harefooted and in rags, and yet he declined to give one cent toward their relief, lest the government be accused of neglecting its army. On our laise day's march we were in high glee, and all were very glad to get back to Corrinis dater as week's absence, expecting to receive full rations and plenty of latters from our kind friends at home. But these hopes were deemed to disappointment, for when we reached Corinth we found it nearly desarted, and we were still in the Southers Confederacy. While we were south trying to discomfaddle the robels, they were sarving us the same trick. Forest had destroyed the railroad between here and Columbas, Kentucky, and we had no more communications with the United States. General Dodge had gone after Forest with nearly all the forces here, and we found ourselves with but one brigade to defend the place. Colonel Mercy sessured command, and he seem ascertained that we had but about five days' rations on

Jailier of the plan which it pretends to second.

One General, for example, was expected to have postoone enough for four bridges—forty-four, it all, Techeve—at the appointed spot by daylight on Wednesday morning. He had no reason why he should not have had them there before the rain. He spent a mod deal of his time on Twa-day in demonstrating that the chances of failure were inserted out of twenty; on Wednesday morning he had fifteen postoons placed in open view of the enount of twenty; on Wednesday morning he had fifteen postoons placed in open view of the enount of the waste of the company and the rost wars statck in the most from two to five mines had, the certainly had done nothing to sharp he own calculation of chances, and can now refer to it as proof of his own aggaitly. CLEVILLED, Oble. Jan. 32th, 1981.

Editors Chicago Tribune:

There has recently appeared, in the public prints some charges of bad condent against the Rey. Mr. Hager, of Chicago. On the occasion when, it is said, he was guilty of improprieties, my wife, with other bedies, was present. She asserts that there was not the least impraspristy in Mr. Hager's maxmer or behavior. I sew the indices and Mr. Hager to getter, myself, a short time after, and they breated him with all due kindness and respect. It was perfectly crident that nothing disagreeable had happened between them. I have positive knowledge of the meeting, on subsequent eccasions, when the most pleasant relations prevailed. Brown-agains.—Our relations, the Chippeway Chick, spenty seaterday in righting the grain elevators and packing houses, in which they manifested much interest. Judging from the apparently careless manner in which it was bandled, they supposed the piles of porkiald aside for packing, were to be farrown away, and expressed great regret that it should be wasted. The matter was essisfactorily explained to them by the interpreter. The celerity with which live hope are turned into pork ready for packing, engaged their wondering gaze for some time. Last evening they accepted the invitation extended them by

McVicker, and aftended the theatre.

Information to James James of the following dispatch was received by telegraph yesterday, and as the person to whom it was addressed cannot be found, we publish it hoping the information may thus reach him or the friends of the decessed:

THE MONEY MARKET.

THE MONEY WARRIES.

Gold was benight to-day at 1850-280. The opening price in New York was 1834. Old Demand. Notes are held at 165. Seven-thirties and one year certificates are without change. It is difficult to quote silver. Brokers are not generally dealing it it to any extent. The sales that are made are generally for manufacturing purposes. We suppose that 1805-189 may be as near the mark as can be got.

Eastern exchange remains about as nonal—160 parthuying; parchy promium celling. Currency in plenty. For the new issue of Transaury notes, the brokers will pay ½, and sell at 160 p permium. The weekly stranges of the banks of the city of New York, on Satuchty Jahnary 17, 150 present in the aggregate the following changes from the previous exhibit of January 19: Increase in loans.
